Providers' Elastomeric Acrylic & Polyurethane roofing membranes are made by national leaders in the industry and a strong supporter of sustainable and renewable building technologies. White, highly reflective roofing materials produce cooler roofs, which lower energy costs, reduce urban air pollution and extend the useful life of the roof system. This means faster payback for the building owner and an increased Return On Investment (ROI). Provider installs a complete line of highly reflective elastomeric coating membranes for RESTORING metal roofs, single-ply membranes, polyurethane foam, modified bitumens and smooth surfaced built-up roofs. Through RESTORATION, we PRESERVE the roof while reducing energy consumption.

Provider Construction, Energy Star™

Provider Constructions highly reflective roof coatings and membranes are Energy Star certified, meet LEED requirements and have been used to restore millions of square feet of roofs.

Metal Roof Restoration

Put the product where the problem is-stop rust with the primer, stop leaks with our reflective roof coating, extend the roof life and cool the building with the finish coat-over 25 years of proven history!

- ✓ Not time consuming fabric installation required
- ✓ Coating is pumped and easily extruded into place along seams/fasteners
- ✓ Primer and finish coat are rapidly pumped and spray applied to the metal surface
- ✓ Cool the building, stop the leaks and improve appearance with attractive, flexible and durable protection
- ✓ Highly reflective Energy Star qualified finish coat

An uncoated roof can absorb up to 83% of the sun's heat and UV rays.

A roof coated with a White Roof Coating can reflect up to 88% of the sun's heat and UV rays.

Single-Ply Restoration

Restore and preserve EPDM, Hypalon ©, PVC, CPA and other membranes with a low-cost alternative designed to extend the life of your roof.

- ✓ Provide protection against damaging UV Rays
- ✓ Stop Shrinking, chalking, and seam deterioration
- ✓ Eliminate water penetration
- ✓ Lower the roof temperature which aids in reducing the rate of deterioration of components, immediately lowering energy costs and increasing a building owners ROI
- ✓ FM and UL approvals

Asphalt Restoration

Reduce the amount of cracking and deterioration of your asphalt roof and coatings by restoring them with our highly reflective elastomeric coatings.

- ✓ Adaptable to nearly every type of asphalt membrane
- ✓ Systems may be applied to new asphalt or modified bitumen to provide immediate protection from weather, UV degradation and chemical deterioration
- ✓ Lower the roof temperature, extend the roof life and aid the environment

Extend Your Current Roof Warranty!

Provider Construction offers the most competitive restoration warranties in the industry. Not only will you increase your ROI with restoration, you can also extend the life of the roof with an inspection and survey of your current roofing system, a Provider employee will determine how many more years of coverage are available through restoring your roof. Extended warranties are available in 5 and 10 year increments for qualifying roofs.
